A little help with sorting.

Binwise | Participant tasks | INFO3315

We are testing the design, not you. Work at your own pace, and tell us what you are thinking. These are example items, rules and locations; recognition is simulated.

01 An empty bottle

You are at the Demo Library bin station with an empty plastic drink bottle. Use the prototype to find where it belongs and what you should do before disposing of it. Tell the facilitator when you are ready.

02 A confusing coffee cup

You have a takeaway coffee cup made of paper with a plastic lining. The scanner may show similar items. Use the prototype to work out which bin to use and any preparation needed. Tell the facilitator when you are ready.

03 A packet the scanner cannot identify

You have an empty chip packet. Use the prototype to find what to do if the scan cannot identify it. Tell the facilitator the recommended bin and any instruction you find.

No sign-in or personal information is needed. You may stop at any time.
